Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In the drawing, Figures 1 and 2 should be labeled "Prior Art". See the descriptions of these figures in the specification.

In the specification, page 2, lines 3 and 4 should be deleted since the specification should support the claims and not vice versa. On page 5, line 8, "17" should be --17, 17'-- and "13" should be --13, 13'-- and in line 9 "13" should be --13, 13'--.

In some places in the claims, "trough" is presented as "through". Correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are indefinite since they fail to set forth a series of direct active steps, i. e., "ing" steps, to provide the method. Instead they set forth an active result. Correction is required.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims are indefinite since they contain elements which lack clear antecedent basis. For example, note "the centre portion", "the bottom", and "the

stationary sides 3 and 3' both sided" in claim 3 lack clear antecedent basis. Also the meaning of the phrase "both sided" in line 5 of claim 3 is unclear. Claim 4 has the same deficiencies as claim 3. The claims should be rewritten to comply with U. S. practice including setting forth the essential elements of the invention and correlating these elements to define an operative device.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hallstrom, Jr..

Note fixed areas 14 and moving areas 18 and the last 5 lines of the abstract in the reference.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jonkka in view of Hallstrom, Jr. or vice versa.

It would have been obvious to substitute a floor as claimed for that in Jonkka in view of the teaching in Hallstrom, Jr. (figure 2) or to provide sides to Hallstrom, Jr. to move solid material in view of the teaching in Jonkka (elements 3, 3'). Note the claims

are not restricted to a single stationary balk; moreover, the number of balks would have been an obvious matter of design choice and/or choice dependent upon the width of the trough.
